AlliedBean Demolition Continues Essential Work in Deerfield Beach on I-95 Hillsboro Bridge

Watch It Come Down

Lead Foreman, William Minton, heads the Alliedbean Demolition Bridge Division. Under his supervision the Alliedbean crew successfully removed the deck, pier caps and piers of the 26,800 SF bridge located on I-95 and Hillsboro Boulevard in Broward County, FL. The removal of this bridge has a very unique set of challenges being an active waterway below and a fully operational expressway that cannot be disrupted.

Here we are removing the remaining concrete pile caps & columns on the bridge.

A Florida Licensed P.E. was used to determine the weights, load displacements & impacts to the active highway for each section of bridge removed.

Due to the active waterway below & the multi lane expressway on both sides of the bridge, the removal was performed using specialty wire saw concrete cutting, torch cutting from barges & the use of deep cutting concrete saws.

Thank you,

From the Entire AlliedBean Demolition Team
